

MAJOR ADVANTAGES

- » Powerful vacuum evacuation system for ultimate efficiency and safety
- » Unsurpassed unit lifetime and low maintenance costs
- » 40, 60 or 70 kwh lithium-ion battery.
- » Onboard charger, 6.6 kW one-phase (8-9 hours)
- » Range ~ 50-75 km at 30 km/h. Operating time ~ 12 hours
- » Optional heat/air-condition

The Vestergaard Company e-VTS - our well-known vacuum toilet service unit has a capacity to drive up to approximately 50 km and operate for approximately 12 hours.

The benefits of using the Vestergaard Vacuum Toilet Service units are reduced time and costs of operation as well as reduced aircraft maintenance. The e-VTS can fulfill just about any

customers' preferences and specific needs and is able to service any aircraft type, in any airport environmental conditions.

Waste and vacuum systems are virtually maintenance free. Tanks and vacuum systems are self-cleaning. Integrated flushing systems automatically cleans all relevant components/systems.

The Vestergaard electrical chassis is based on standard industrial, electronic components, which are thoroughly tried and tested.

Operators can now operate equipment in closed gate areas with zero emission no noise and no small particle pollution - it is even possible to service aircraft in closed hangars.
