

# ELEPHANT® e-MY Lite

MY LITE IN A FULLY ELECTRIC VERSION

## MAJOR ADVANTAGES

- » Electric operation for minimal carbon footprint
- » One-man operation (optional) for manpower savings
- » Easy maneuverability
- » Easy training
- » Low maintenance costs
- » Virtually noise free

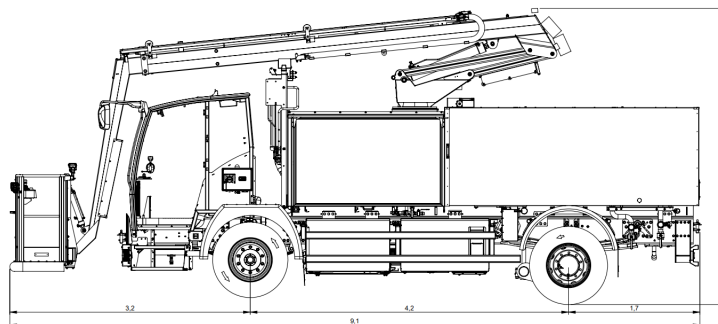

Vestergaard Company is proud to release its popular MY Lite in a fully electric version. The MY Lite is an open-basket deicer designed for premix Type I and pure Type II/IV in two tanks with a total of 7,600 liters.

The MY Lite is a work horse for all airports and operations, but primarily designed for regional airports with less traffic or airports with less Winter conditions. Training is simple, and the unit can be ordered with one-man operation, so you can save on man power.

Now it is available in an electric version. Vestergaard Company's own chassis with battery packs of 70 or 140 kwh and with a 22 kwh onboard charger. Fluid heating can be fully electric, 40 kw or with a 230 kw diesel heater. If pre-heated fluid is available no diesel is needed.

The e-MY Lite can operate virtually quiet and small-particle pollution on the ramp is eliminated. When driving the unit, the view from the driver's seat is excellent and unobstructed.

The e-MY Lite can fill via onboard pumps. The e-MY Lite, like its sister unit the MY Lite, has a number of options available: ground gun, access to tanks via manholes, basket side cover, coupling for bottom filling, hot-at-nozzle, additional spray gun in basket, one-man operation, reverse camera, level display at side of tank section, flow sensor for sprayed liquid, and basket sensors for safety.
