

# ELEPHANT® BETA CONVENTIONAL

## EFFICIENT DEICING

### MAJOR ADVANTAGES

- » Optimal one-meter nozzle distance on more than 90% of critical surfaces
- » Higher reliability
- » Ergonomic design
- » One-man operation
- » Proportional mixing for optimal glycol percentage
- » Fuel-efficient hydrostatic drive

The Elephant® BETA delivers highly efficient, reliable, and safe aircraft deicing to customers worldwide. Its extended telescopic boom reduces application time, minimizes ground movement around the aircraft, and lowers glycol consumption. The spacious operator's cabin ensures unmatched visibility, enhancing both precision and safety throughout the operation.

With its original design and exceptional build quality, the Elephant® BETA is recognized as the most efficient deicer available—capable of servicing all aircraft types and particularly well-suited for remote deicing operations.

#### The Elephant® BETA is offered in two configurations:

- Standardized model – an off-the-shelf solution with shorter delivery times and a fixed set of options.
- Customized model – fully tailored to meet unique customer specifications.

A wide range of options further enhances performance, including hydrostatic gearbox for, precise maneuvering, one-man operation capability, proportional fluid mixing system, 600 kW diesel heater, Electric Hotline system to prevent freezing and dual ground guns.
